Eu instalei o Guitar Rig pro e nada! A: Não é um problema de instalação ou compatibilidade, está tudo ok, o problema é no teclado, então é por causa de drivers ou pacotes de idiomas que não estão instalados ou carregados. A forma mais simples de fazer isso é reinstalar o Windows 10. Esse tipo de problema muitas vezes acontece porque não é instalado o gguitar :)

Spermatogenesis and superovulation in the pony. Two pony mares, both prepubertal, were used in an attempt to study spermatogenesis and superovulation. Both were induced to cycle regularly every 3 months by synchronizing the breeding season.

This, in turn, was accomplished by intramuscular injection of prostaglandin F2 alpha (PGF2 alpha) every 2 months. The first mare was used as a control (C) and the second mare as a test (T) with the following treatments: 1) a single injection of 5 mg PGF2 alpha (PG) to induce superovulation, and 2) 10 mg PGF2 alpha (P) to induce superovulation plus gonadotropin treatment to trigger ovulation (or what was believed to be ovulation) and induce a second wave of follicular development. P treatment caused ovulation in the first mare but not in the second mare. When P was combined with PG, however, ovulation occurred in both mares. In order to evaluate the superovulatory effect of PGF2 alpha, the animals were treated with PGF2 alpha on day 0 of the cycle and semen was collected from the first mare on day 7. T showed no increase in ovarian follicular or luteal activity, suggesting that superovulation could not be induced.
