Gable Spider, Small

A spider the size of an alley cat scampers up the side of a tenement building, in its mandibles, it drags what appears to be a clothesline, with many of the garments still dangling limply behind.

Image - Gable Spider

Gable spiders are different from other varieties of giant spiders, and it is for this reason that the whole of the city isn't shrouded in endless sheets of webbing. Gable spiders are not web spinners. Although they don't spin webs, gable spiders do have glands that produce a sticky fluid. This natural glue is used to string together the detritus they find in the city's dumps and alleys—frayed ropes, sail cordage, clothesline, twisted rags, curtains, discarded cloth, and more—into weblike structures. Even old and broken lumber can be found in the weblike contrivances spiders build. They combine this myriad material in two or three of suspended lines that rival the largest spider webs for knot and anchor these mismatched lines among the rotting buildings, and with each other to create a way out of junk. Anything foolish enough to enter one of their constructions is unlikely ever to leave.

The spiders also coat lengths of rope, cloth, sawdust, or soft material with their fluid, wad it into a ball, and fling it at creatures they're fighting. The sticky mass can glue a making it easy prey for the gable spider's poison.

Honestly this game has some good and bad, but the gameplay is unique enough to overpower the bad. Really awesome how you can change from isometric and 1st person, still can't figure out if there's even an option to make it fullscreen... but meh. Oh well. This game didn't really get the attention it deserved.. This game needs polish, but apart from that, its great. Really great. Will be looking back into it in a couple of months time but we need to remember that this is an indie game and someone said its a one man team. Meaning give him some slack!. My computer was strained trying to run these amazing graphics. However, from what little I could play, I recommend this game to those can run it.. Patchouli is my wife and I am canonically her husband. We are happily in love.. Botfest 2017. Video of gameplay: <https://youtu.be/oqmvzWVWY8g>

[This game is a great concept for VR. You are legless, sitting on the ground from your waist up. You can climb, crawl, & fling yourself anywhere you want on the map, even up trees! There are powerup cards that rest on your forearm and you throw them to use them. This ranges from magic windwinds to rocket launchers on your shoulders. You have a regular laser gun at your hip to use as well. Hopefully more people pick up this game because I could only find one lobby with one person in it. I think bots is a must for this game, otherwise there won't be a big enough players right now.](#)

[Pros: Awesome concept](#)
[Movement is smooth and managable](#)
[Lots of powerup types](#)

[Cons: Everything is blurry\grainy at distance. Anything more than 4 feet in front of you.](#)
[This is multiplayer only, no bots. Without a playerbase this game will not last.](#)
[.It's a pretty basic remake of the classic Minesweeper, but in 4 dimensions](#)

[Pros:](#)
[- it's 4D](#)
[- the "donut" field mode](#)
[- the "delta" mode for the numbers lets you exclude some trivial calculations](#)

[So-so:](#)
[- I recall a few similar games from the 2000s \(e.g. Minefield 6D\) which had all this stuff and even more features, e.g. 3D, and 5D+ fields. I still like that there is a game on Steam about 4D, finally \(I can't wait until Miegacure comes out btw\). Though this game, since it's on Steam, should have at least to be better than free old apps out there..](#)

[Cons:](#)
[- frequent crashes in the recent update \(after you start new game and click on cell \(0, 0, 0, 0\) it seems to always crash](#)
[- dull look, and all those "0" tiles which create clutter. Even the original Microsoft's game probably looked better than this one](#)
[- I'm pretty sure that using "Minesweeper" in the title is not allowed since the name is Microsoft's trademark. Even on Linux this game was called "Mines" to avoid a lawsuit from MS](#)
[- left+right click should open all tiles around the clicked one, if the number of flagged tiles around it is the same as the number on the tile - that's how the original Minesweeper worked](#)

[Overall: finally something 4D on Steam, but needs work. So far it looks like a school\student assignment, not ready for a commercial release both in presentation and in feature set.. they need to update it i cant access my menu.....](#)

[JUNK. Look at that booty, show me the booty](#)
[Give me the booty, I want the the booty](#)
[Back up the booty, I need the booty](#)
[\(\u0361\u00b0 \u035c\u0296 \u0361\u00b0\)](#)

Love this game, simply a HD version of Asteroids!. It has its flaws and I was more than scared to be honest, due to the confusing puzzles and battle mechanics at first. But, it was okay. Not too great, but not too bad at the same time. I'd recommend it if you wanna just have a short horror fun.. This game is the sequel to the free-to-play Serafina's Saga. While nominally associated with that game, Serafina is not the protagonist in this title. Instead, she is one of the possible future rulers of Darzia. And may well have ended up that way, except for the little matter of the death of the previous queen, and suspicions that land on each of the claimants, leaving the protagonist Odell Perin as regent. Now you have to figure out how to rule while trying to find the true killer.4

Perhaps you yourself will take the crown.. Very nice game in the style of the Professor Layton games for the DS. Nice puzzles, with varying degrees of difficulty, and an interesting plot, made all the more interesting by its episodic format.. Nice skin; if you really want to update your APS' look get this. This is bug filled trash. Looks like a college students class project. I HIGHLY recommended people to stay away from this. Don't even try it, even if it is free.. Worth the 2 quarters I spent to play this game and only play it once. By level 45 you just buy the potion that increases castle and people by 25% and its like over. Bad programing on that part. I prefer the classic Age of Castles over this.. Fantastic skin, looks awesome and expolding is the best part of this skin!. Fun game if you just want to shoot things with friends. enemies are huge and have large hitboxes. there are lots of guns and weapons. I like wingdiver best because you can fly around.
