The most perspective rpg in 2018. Thanks to Seaborgium Entertainment for this. I will wait new games from u guys! Good luck with ur projects!. The idea for the game was great but it is not worth buying.

1. Not much to do in the game, after playing for 2 hours it feels like the game isn't finished at all.
2. The english translation needs alot of work aswell but you can atleast understand what the npcs want from you.
3. The fighting system is a very standart rpg maker style and you can get through the game very easy by just attacking and using a potion from time to time.

I would give the game a 2/10 for the idea, but overall it is not something i can recommend.
